	REDUCE MARINE POLLUTION	PROTECT AND RESTORE ECOSYSTEMS	REDUCE OCEAN ACIDIFICATION	CONSERVE COASTAL AND MARINE AREAS			

BLUE LIMIT

Team Members:

Hajer Elaamri, Ayat Ahmed, Mariyah Abdulaziz, Sara Aljunaid, Heba Radhi

What challenges are we aiming to address?

- **Increased Risk to Slow-Moving Marine Animals**

Species like dugongs and sea turtles are especially vulnerable to vessel collisions and underwater noise due to their slow movement and frequent surfacing behavior (WWF and IUCN Reports on Gulf marine species conservation).

- **Underwater Noise Pollution**

Recognized by the United Nations Decade of Ocean Science (2021) as a major emerging marine pollution threat.

- **Lack of Marine Speed Laws**

Unlike the UAE, Bahrain has no formal eco-speed marine regulations (UAE Federal Law No. 23 of 1999 regulates sensitive marine zones).

- **Risk of Losing Marine Biodiversity**

World Wildlife Fund (WWF Gulf Reports) highlight growing risks to Gulf marine biodiversity from human activity and lack of enforcement.

This sea turtle was injured by a boat collision.

What is Blue Limit?

- Blue Limit is a smart marine monitoring device designed for boats and jet skis.
- It tracks vessel speed and location in real time to support safer and more sustainable navigation.

The background is a solid blue color. There are several small, dark blue bird silhouettes in flight. In the top left and top right corners, there are small, light blue cloud shapes. At the bottom of the image, there is a dark blue horizontal band representing water, with a wavy line separating it from the sky.

Why Blue Limit is Needed

Sustainability

- ✓ **Protects** endangered marine species, **reduces** underwater noise pollution, and **supports** Bahrain's national goals by advancing SDG 14: Life Below Water.

Scalability

- ✓ **Adapts** easily to any boat or jet ski, **updates** sensitive marine areas dynamically, and **expands** across Bahrain and the Gulf region.

Feasibility

- ✓ **Offers** low-cost, easy installation, **meets** strong market demand, and **secures funding** through **UNDP Bahrain, World Bank Grants, and Tamkeen Bahrain.**

Production

Optimus GV75MG Waterproof GPS Tracker

- Real-time GPS tracking via mobile app
- Waterproof design suitable for marine environments
- Compact and easy to install
- Provides location history and alerts

The background is a solid blue color. There are several small, dark blue bird silhouettes in flight. In the top left and top right corners, there are small, light blue cloud shapes. At the bottom of the image, there is a dark blue horizontal band representing water, with a few light blue wavy lines indicating ripples.

Business Plan

Revenue Streams

- Revenue per Unit
- Mandatory Maintenance

Target Market

- Government Organizations (e.g SCE)
- Bahrain Coast Guard
- Maritime Authorities
- Environmental Protection Agencies

Initial Budget

Category	Estimated Cost (BD)
Programming	1,500
Marketing	150
Production of 50 Units	1,035.5 BD (20.71 per unit)
Shipping	14.7 BD
Contingency Fund	150
Total Estimated Costs	2,850.2

Post-Testing Budget

Category	Estimated Cost (BD)
Production of 764 - Units (Number of boats and jet skis and boats)	15,822.44 (20.71 per unit)
Shipping	87
Estimated Total Budget	15,909.44 BD

Total Monthly Profit = 17,707 BD

How it can be beneficial for Bahrain

- **Protects Bahrain's Marine Biodiversity:**

Real-time monitoring helps safeguard endangered species like dugongs, sea turtles, and dolphins.

- **Supports Smart Policy Development:**

Data collected by Blue Limit can help the Supreme Council for Environment propose eco-speed marine laws – similar to the successful model in the UAE.

- **Enables Effective Enforcement:**

Facilitates collaboration between the Bahrain Coast Guard and the Supreme Council for Environment for active monitoring and enforcement in sensitive marine zones.

- **Positions Bahrain as a Regional Pioneer**

By leading the adoption of smart marine protection technologies, Bahrain can set a new standard for environmental innovation and sustainability in the Gulf region.

Thank you

Any question?
